

ISC Class XII Module Distribution		
Chemistry	Mathematics	Physics
Module 1		
Relative Molecular Mass and Mole	Determinants	Electrostatics
States of Matters: Structure and Properties	Matrices	Current Electricity
Chemical Kinetics	Boolean Algebra	
	Complex Nos.	
Module 2		
Chemical Equilibria	Revision Class XI (Calculus)	Magnetism
Ionic Equilibria	Integrals (Advance)	Electromagnetism
Electrochemistry	Application of Integrals	Alternating Current Circuits
	Differential Equations	
Module 3		
Coordination Compounds	Parabola	Wave Optics
Chemistry of p-Block Elements	Ellipse	Ray Optics and Optical Instruments
Preparation, Properties and Use of Compounds of group 16, 17-Ozone, Sulphur Dioxide, Sulphuric Acid, hydrochloric Acid	Hyperbola	
Chemistry of Transition and Inner-Transition Elements		
Module 4		
Alcohols and Phenols	Vectors	Electrons and Photons
Ethers, Carbonyl Compounds	3-D Geometry	Atoms
Carboxylic acids and Acid Derivatives	Inverse Trigonometric Function	Nuclei
Cyanide Isocyanide, Nitro compounds and Amines		Nuclear Energy
Module 5		
Polymers	Correlation and Regression	Semiconductor Devices
Isomerism	Probability	
Biomolecules
